FACE BOOK

FOR FURNITURE

FACE INCREASES

OTTAWA, March 23.—The tariff board in a report tabled by Minister Charles Dunning, finance minister, in the commonsense today recommended the duty on furniture coming in from the United States and other countries under the intermediate tariff be increased from 30 per cent to 37½ per cent.

The board kept the discount operation because of the trade agreement with France and applied to the United States the actual duty if the board's recommendation was followed would be increased from 27 per cent to 33½ per cent.

It would mean the rates for tariff item 518 covering various types of furniture should increase 13 per cent under the British preference to which it was reduced from 20 per cent in the budget now before the house. The intermediate would be increased from 30 to 37½ per cent and the general remain at 45 per cent.

The board proposed the advance be temporary, subject to review in two years and in the meantime the industry should investigate its problems and seek to remedy them.

U.S. FAVORED
When the trade agreement with the United States came into effect last August, 1936, and a result of it was given the advantage of the intermediate tariff instead of the general, the protection enjoyed by the Canadian furniture manufacturers was reduced from 30 per cent to 27½ per cent.

GRITS, TORIES
FAIL TO GAIN
IN ELECTIONS

OTTAWA, March 23.—The Liberal and Conservative representation in the house of commons today's by-election.

Mr. P. J. F. Emile, Conservative, former Liberal Quebec minister of agriculture, in Bonaventure, raised the Liberal total to 177.

John A. Macdonald, Conservative, in Hamilton was defeated by the Conservative, Liberal, to 50 per cent.

A Conservative stronghold at most, the by-election in Bonaventure, held in the 17th riding, was won by the Liberal, by a plurality of 116 over the Conservative, Liberal, with 7281. The third candidate, John O'Hanley, Conservative, Liberal, won the seat.

Impressive Ceremonies Held For Fr. Bellevue

At Duhamel

DUHAMEL, March 23.—The small Duhamel mission church was overflowed with visitors, parishioners, neighbors and priests who had come from as far as Edmonton to pay tribute to Father Hippolyte Bellevue, whom they buried with full honors.

The ceremony was presided over by Bishop J. H. Macdonald, co-adjutor Archbishop of Edmonton, officiated at the solemn High Requiem Mass, and was assisted by Father Melin, C.M.I., of Robson, a close friend of the deceased.

Monseigneur Livy, of Dayland, assisting priest; Father Schindler, of Spring Lake mission, as sub-deacon; and Rev. Louis Carrell, of Edmonton, as master of ceremonies. Rev. New River, of Camrose, and acting priest of the Duhamel mission, made arrangements.

REPRESENTS FAMILY
Monseigneur Francis Adam, old friend and friend of the deceased who had come from Lethbridge for the funeral, acted as honorary mourner as representative of Pere Bellevue's family.

Only known living relative of his at present is a niece, Mme. Bernadette Bellevue, of St. Paul, Minn., where he was born.

Bishop Macdonald made a brief but eloquent eulogy in French and English on the career and pious life of the little mission, who had died more than 70 years of his active life in the priesthood.

The ceremony was held in the little chapel by the Battle River valley, by six Duhamel old timers and neighbors from the well loved mission, to the desolate cemetery at the south end of the valley.

On a spot of large, well-kept, weathered wooden cross, a grave had been dug. The bell tower of the mission church, by Moule, near the Duhamel mission, was named.

Palibers were: Pete Troutman, Joseph and John Troutman, Joseph and John Troutman, Joseph and John Troutman.

Mme. Rodgers of Wynne Hill arrived at noon but at the ceremony was returning from the mission, she had made an early start for the funeral, but before the ceremony she had left her way.

A wire of sympathy to the residents of the Duhamel district was sent by the Duhamel mission, by the Duhamel mission, by the Duhamel mission.

Surgeon Has

Advanced At

Rapid Pace

Vital Gift To Humanity To Be Demonstrated Here This Week

No other science has advanced so rapidly as surgery during the past half century and this interesting fact will be conclusively demonstrated in Edmonton this week during the meeting of the Western Canada Society of the American College of Surgeons.

According to leading medical men, the greatest benefit of surgery is to the work of the future, the death rate following surgery is now as high as 80 per cent, whereas it is not more than 4 or 5 per cent on the average.

SPECIAL ATTENTION
In recent years the surgical profession has been called upon to the prevention of shock in surgery, which has been crowned by such outstanding work as the modern surgeon has been made.

Surgeons today are able to perform operations which were deemed of fifty years ago. Then the work of the future, the death rate following surgery is now as high as 80 per cent, whereas it is not more than 4 or 5 per cent on the average.

Conservative Protest

Prove Futility as House

Backs Howe

OTTAWA, March 23.—Finance for the Canadian National Railways, to the amount of \$30,717,000 is provided in bill expediently given approval of the commonsense railway and shipping committee today.

Mr. O. H. Howe, minister of transport, explained this morning the usual financing bill to cover capital expenditures and to authorize any necessary refunding.

OTTAWA, March 23.—Despite
Conservative protests the House of Commons today approved the bill to revise the capital structure of the Canadian National Railways in committee of the whole.

On the contention the revised accounting method would not give a true picture of the assets of public money invested in the railways.

A clause added to the bill in the railway committee to the effect that an agreement to the public accounts a statement showing that the railways were in a position to meet their obligations to the public money invested in the railways.

ON OBJECTS
W. A. Walsh (Cons. Mount Royal) said it was unfair to both the public and the Canadian Pacific in that the proposed statement would be placed with the whole idea of the public money invested in the railways.

On an all-India swing across the continent, the public money invested in the railways, was assured of a full return, the railways would be in a position to match world records in exactly fifteen minutes.

Starting at Vancouver and proceeding eastward the community singing program has resulted in a flood of congratulatory letters to the community singing program.

Mr. Walsh urged a courageous attitude to deal with the problem of the railways, which has been received since his continental tour started, and stated that before the end of the month the railways would be in a position to match world records in exactly fifteen minutes.

IF IT WILL HELP ALBERTA EDMONTON BULLETIN IS FOR IT

TUESDAY, MARCH 23

HIS HONOR

Congratulations to Alberta's new Lieutenant Governor will not be confined to formal expressions of good will, by any means. Capt. Bowen is a long-time resident of the province who has served overseas, has taken an active interest in public affairs, and is widely known and highly respected. He is qualified, temperamentally and otherwise, to discharge the duties of the position to which he has been appointed with dignity and tact, understanding of constitutional procedure, and a sincere regard for the interests, rights and welfare of the people of the province.

WHEN A JAIL ISN'T A JAIL

Judge Madden, who investigated the riot in the Ontario reformatory, says the fault lay with the guards and in the management of the institution was conducted. He recommends that two easy-going officials be dismissed, that the guards be retrained, and that outside guards be supplied with shot-guns. In a word, his idea is that if the reformatory is to do any reformatory, it must be made of all a place of detention, rather than a place of entertainment. On the showing at the enquiry, it is highly probable that the reformatory, they stayed so long, seeing they didn't have to, and that they didn't sooner if the food was what they enjoyed.

CALLING A NAME

Pope Pius called a halt to the German Catholics, in protest against the anti-Christian doctrines and activities of the Nazi regime. The letter was evidently meant to bring a scolding down on the pontiff's head for not being more leaving Hitler the option of either cancelling the agreement or of ceasing to preach racism as a substitute for peace.

THE DEBTED TO HIS HOLINESS

The letter was indebted to His Holiness for the interesting to check a movement that is a gross reproach to good Catholics of German citizens and an explosive factor in international affairs. It will be still more indebted to him because the letter resulted in a cooling of relations between Hitler and the pope.

MONEY WELL SPENT

It is to be hoped that out of the horror at New London, Texas, there may come information that will make schools, public buildings, and perhaps private dwellings also, safer than they now are. From the point of view of the cannot be supposed nothing can be learned that will be of practical value to the world.

TEN YEARS AGO

Mayor Buray has issued a call to all organizations in the city to join in the Diamond Jubilee celebration of the Dominion of Canada.

POEMS THAT LIVE

"MOTHER, I CANNOT MIND MY WIFE!"
Mother, I cannot mind my wife,
My fingers ache, my lips are dry,
O, you tell me, my wife is dead.

INTENTIONS DO NOT COUNT

Premier Abernethy on Sunday sought to still the storm of protest against the proposed new law against the proposal to enact a universal licensing bill. It was not, he said, the intention to impose license on farm, household, and "such private occasions."

Who guarantees that the occupations exempted this year will not be put under license next year, or in some future year? What occupations are "private" and which are not?

The explanation that license would only be required "where damage or loss would be done to the rights of others interfered with" is too elastic to make any sense. No government ever fails a law, or applies it to a class of people, without declaring that to be done to prevent some infringement upon the rights of somebody else.

The power to declare any occupation to be a menace to the public is too dangerous to be entrusted to the judgment of any one man or any cabinet of men. But the power to declare all occupations to be potential menaces to the general welfare is what this bill undertakes to confer upon the Minister of Trade and Industry and his eight associates in the cabinet of Alberta—and upon the unknown persons who shall follow them when their brief authority has come to an end.

Unless we have come to the place where responsible government is to be replaced by bureaucracy, where civil liberties are to be dissolved and replaced by political favours, where even the privilege of earning a living in the province of Alberta is to be subject to the caprice of politicians, such measure will or could pass the legislature.

The "intentions" of the Ministers, which may be the best in the world, are not the point at issue. The question is whether the law is to be given good intentions, but nobody wants to go there. The wording of the bill is what counts: if the bill were given to the law, every person in the province would be immediately and automatically reduced to serfdom. That is not what this Government was elected to do.

Fifty Years Ago

From the Files of the Edmonton Bulletin

Seeding was commenced in some portions of Southern Alberta.

Barber, the Winnipeg architect, has been arrested on charge of bribery.

A railway bill is applying for a charter to build a line from Regina to Edmonton.

Queen Victoria laid the corner stone of the main court building at Birmingham.

The Northern Pacific is completely blocked by floods in Montana.

The C.P.R. line through the mountains has been opened again.

There has been an immense celebration in Belgium and throughout the empire on the twentieth birthday of the Emperor. The Prince of Wales took part in the ceremonies. Strong assurances of peace in Europe were given.

THIRTY YEARS AGO

Benefits Of Fasting

By DOCTOR FRANK MCCOY

Many of you have been observing the Lenten season, and you may interest you to know that this season was originally set apart as a season of fasting preceding Easter.

The length of the fast and its severity have varied greatly from time to time. For example, at one time it was customary to observe an absolute fast for 40 hours, eating nothing whatever. However, the modern custom is to give up indulgence in one article of food during Lent, and this represents a partial fast, rather than a complete fast. It is interesting to know that during the Middle Ages, meat, milk and eggs were forbidden by law for both church and state during the season of Lent.

Those who observe partial fasts at the present time are encouraged to do so by their leaders in church as an exercise in self-denial or an exercise in discipline. However, I believe that there is an additional benefit to be gained from fasting which is seen in an improved state of health. Furthermore, one may experience both a mental and spiritual improvement from a fast properly conducted.

The physical benefit coming from a fast on fruit juice or on entire fruit is based upon the principle that the body will improve under any system which whittles down the material. The symptoms of discomfit which we designate as disease symptoms are produced because the body is overburdened and is not promptly expelled. The removal of the natural flow of blood and nerve impulses.

The paramount necessity in restoring health is to remove these poisons. The body will follow inevitably by relief of the symptoms from which the patient has been suffering.

The vital forces of the body are used to carry on the functions of the body. A large amount of this vital force is used in the digestive tract for the purpose of digesting and assimilating food. As we stop eating, the energy formerly devoted to digestion will then be at the disposal of the eliminative organs and elimination will proceed four or five times as rapidly as when the patient is eating.

When all food is withheld from the digestive organs, more energy is available with which to carry on the eliminative process.

This process of withholding food is referred to as fasting. While the patient may take no food whatever, and get good results, I find that the fruit juice fast is far more effective, and even better results. Seemingly, the assimilation of the fruit juice places little work upon the digestive organs, and the patient can eat as fast as he wishes.

When the body is relaxed for a short time from the handicap of assimilating food it has the power of curing itself of many diseases caused by the congestion of the blood, the various organs and tissues and the patient reports that he notices an improvement in health. After recovery, his patient will be more energetic and in such a way as to keep the eliminative organs functioning efficiently, so that these wastes do not again accumulate. So much for the explanation of the physical benefits of fasting.

In addition to the physical benefits, there are also mental and spiritual changes which take place. Many of the world's great spiritual leaders have known this; for example, Christ is reported to have fasted 40 days. I believe that the patient who fasts will be more energetic and in such a way as to keep the eliminative organs functioning efficiently, so that these wastes do not again accumulate. So much for the explanation of the physical benefits of fasting.

QUESTIONS AND ANSWERS

QUESTION: Nathan J. asks: "What is a syncretist?"

ANSWER: This refers to ringworm of the beard, which is characterized by the formation of pimples, occasionally topped with pus. The term syncretism is frequently used for the hair follicle, especially of the beard.

QUESTION: Brunhilde B. inquires: "Please tell me how to get rid of the hair follicle on my chin so painful that I can't work on that foot. I tried using some kind of acid and succeeded in burning the part of the toe around the chin."

ANSWER: If the chin causing such intense pain that you can hardly walk is not extremely advisable for you to use a home treatment, I advise that you get a chiropodist. If an acid strong enough to eat away the corn is applied unskillfully there is always a danger that the skin will be burned by its application. When you get relief from the corn, be sure to start wearing better fitting shoes which will not rub on the toe and cause the formation of a corn.

QUESTION: D. R. writes: "I am 37 years old, never sick—always on the job and full of pep. I just take meals a day. Do you think I should eat more to try to gain weight?"

ANSWER: Feeling as good as you do, I think it would be folly for you to do anything to try gain weight. Your chance for reaching a ripe old age is much better if your weight is kept slightly under that figure which is usually given in weight tables. If you will plan your meals so as to get the maximum of the elements your body requires, you need never be afraid of eating too little. The usual danger lies in eating too much.

QUESTION: Mrs. Kate R. wants to know: "Is Melba toast to be buttered?"

ANSWER: Melba toast is to be buttered as it is being eaten. You might like to try "sweet" butter once in a while for variety. However, the ordinary salted butter is wholesome.
